Subject: FMCV Public Meetings and the HAMP

Dan Fraser of Sleeping Giant, the contractor that conducts the sanitary surveys for the Region 9 tribal water systems, has offered to make a slide presentation to the three First Mesa villages, as well as FMCV, about the less than perfect state of the Polacca water system. This presentation could provide information to the First Mesa villages and FMCV to help push the HAMP activities forward with the Tribal Council from the village level. This presentation could be held in conjunction with any future meetings that IHS and/or WRP plans to have with the First Mesa villages and FMCV to discuss the HAMP.

The only condition that Dan has with making the presentation is that it has to be done when he is in the "area" doing sanitary surveys. There is no money in his contract to make a separate trip to Hopi just for the presentation.
